

GO DECORATIVE PASTE

TEXTURED PAINT

GO Decorative Paste is a premium acrylic-based textured wall coating for architectural finishes. It provides excellent durability, crack-bridging capability, and weather resistance, while delivering a wide range of decorative relief textures. The coating forms a breathable yet water-resistant film, ensuring long-lasting protection and aesthetics in harsh environmental conditions.

GO WEATHERGUARD

MATT EMULSION PAINT

GO Weatherguard is a high-performance exterior acrylic finish specially formulated to resist UV degradation, rain penetration, and fungal/algae growth. It combines superior durability, colour retention, and flexibility to protect and beautify exterior walls in harsh tropical climates.

GO SILK SHEEN

SILK EMULSION PAINT

GO Silk Sheen is a high-quality, washable interior vinyl-acrylic emulsion formulated to deliver a luxurious silk sheen finish. It provides excellent opacity, scrub resistance, and stain resistance, making it suitable for premium projects requiring long-lasting beauty and durability.

GO PASTE PRIMER

TEXTURED PAINT

Gotex Primer is a pigmented acrylic resin-bonded primer designed to provide a uniform base for textured coatings. It stabilises porous surfaces, improves adhesion, and enhances colour uniformity of the finishing coat. Its alkali resistance ensures long-term durability on new plaster and cementitious substrates.

GO MATT EMULSION

MATT EMULSION PAINT

GO Matt Emulsion is a high-quality, water-based acrylic emulsion paint formulated to provide a smooth matt finish with excellent coverage. It offers outstanding opacity, washability, and resistance to chalking and flaking, making it suitable for both interior and exterior applications.

GO WALL FILLER

IN FORM OF PASTE

GO Wall Filler is a ready-mixed, premium-quality interior paste filler designed to smoothen and level uneven wall and ceiling surfaces. It provides an excellent substrate for decorative paints, ensuring a durable and uniform finish.

GO UNDERCOAT

WATER BASED UNDERCOAT

GO Undercoat is a high-performance alkyd-based intermediate coat for use beneath solvent-based enamels. It provides superior opacity, adhesion, and surface filling, ensuring a durable and even finish for gloss or satin enamels.
